COMMUNICATION RE FAVORABLE IPER BY IPEA/US IN CORRESPONDING INTERNATIONAL APPLICATION

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

This communication is to advise the Examiner of the favorable International Preliminary Examination Report (IPER) issued by the United States Patent and Trademark Office acting as International Preliminary Examination Authority in a corresponding international application. A copy of the IPER is enclosed.

The original and published PCT claims correspond to the claims in this U.S. application.

Applicant: Stephen E. Terry Application No.: 10/632,776

In view of the fact that PCT claims 1-28 have all been found to meet the international standards of patentability, prompt examination and allowance are respectfully requested.

Respectfully submitted,

Stephen E. Terry

Jeffrey M. Glabick

INTERDIGITAL TECHNOLOGY CORPORATION

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

2

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/US03/24289

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1. STATEMENT				
Novelty (N)	Claims	1-28	YES	
		NONE	NO	
Inventive Step (IS)	Claims	1-28	YES	
	Claims	NONE	NO	
Industrial Ameliochility (IA)	Claima	1.20	YES	
Industrial Applicability (IA)	Claims Claims		NO	
	Ciamis	·		
Claims 1-28 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a transmitter using a power control information from each receiver and adjusting a transmission power level of the particular channel so that if any receiver requires an increase in the transmission power level to meet that receiver quality requirement, the transmission power level is increase and if all receivers exceed their quality requirement, the transmission power level is decreased. Although it is well known to transmit data over a particular channel from a transmitter to a plurality of receiver. The particular channel is received at the plurality of receivers. Each of the receivers sends power control information to the transmitter based on a measured reception quality and a reception quality requirements of each receiver. The prior art of record does fail to use the power control information from each receiver and adjusts a transmission power level of the particular channel so that if any receiver requires an increase in the transmission power level to meet that receiver quality requirement, the transmission power level is decreased. Furthermore, prior art such as Derryberry (US 6,498,785) does disclose a transmitter using power control information from each receiver and adjusts a transmission power level of the particular channel so that if any receiver requires an increase in the transmission power level to meet that receiver quality requirement, the transmission power level is increase and if all receivers exceed their quality requirement, the transmission power level is increase and if all receivers exceed their quality requirement, the transmission power level is increase and if all receivers exceed their quality requirement, the transmission power level is increase and if all receivers exceed their quality requirement.
